## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 7 is objected to because of the following informalities: In line 21, "firs main" should be "first main". Appropriate correction is required.
2. Claim 13 is objected to because of the following informalities: In line 8, "same" should be deleted from "same first main spindle" and "same sub-spindle". To correct the lack of antecedent basis, "same machining tool" should be replaced with "a machining tool". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 13 recites the limitation "same machining tool" in line 8. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2125

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Fishman et al. U.S. Patent 6,741,905. Fishman discloses a method for creating a machining program for machining a workpiece into a product model, the method comprising: determining a type of machining device controlled by a numeric controller, wherein the type of machining device comprises one of: a two-spindle machine having a first main spindle and a sub-spindle (col. 16, lines 35-44) and a one-spindle machine having a second main spindle (col. 17, lines 53-59); and generating the machining program for the machining of the workpiece into the product model based on the determined type of the machining device, wherein the machining program generated for the two-spindle machine (col. 19, lines 7-15) is different from the machining program generated for the one-spindle machine (col. 18 and 19, lines 64-6).

***Allowable Subject Matter***

8. Claims 7-11 are allowed.

9. Claim 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2125
